NORR, LLC Announces Investment in Future Architects in South Florida at Tampa Office Grand Opening

TAMPA, June 12, 2008 – NORR, LLC announced at the Grand Opening of the Tampa office on June 12th that they are investing in their new community and in the future of young architects in the Tampa area, with an annual award for a student in the department of Architecture and Community Design at the University of South Florida.

"We are grateful to NORR for their interest and confidence in our students, and our program," stated Beth Bosserman, Director of Development, School of Architecture & Community Design at the University of South Florida.

This award will be known as the "NORR, LLC Scholarship for Architecture" and will be presented to a full-time undergraduate architecture students entering the fourth or fifth year of the professional program and graduate level students majoring in architecture.

The Award will recognize a student who has exhibited professional promise in the practice of architecture and has a minimum 3.0 cumulative GPA. Students will submit an essay along with samples of work based on a prevalent architectural subject (to be determined by the USF and NORR). Each year scholarship recipients will have the opportunity to join NORR, LLC Tampa for a summer internship. The first award will be presented in the fall of 2008.

The Grand Opening event included not only the new scholarship and internship opportunity presentation, but the Greater Tampa Chamber of Commerce welcomed NORR, LLC Tampa as new members of the business community with a ribbon cutting ceremony and PCP Wine International hosted an exclusive wine tasting of selected fine wines from around the world not sold in stores.

The Tampa opening is the second US office for NORR, LCC, which is a member of the Ingenium Group of companies, a global architectural and engineering leader.

"The establishment of NORR, LLC in Florida is a key part of the Ingenium Group's strategic growth plan," stated Coreen Paul, Senior Director of Commercial Services, NORR, LLC Tampa and Detroit. "This new location is not only in a consistently high growth area in the US, but will allow us to better serve clients in Florida, other Southeast States and the Caribbean."

According to Victor Smith, Ingenium President and CEO, "NORR, LLC in Tampa provides us with an excellent opportunity to continue expanding our architecture and engineering practice in the commercial, hospitality and retail market sectors."

NORR LLC, Tampa Office Grand Opening, 2

NORR's Tampa Office currently employs four people and has aggressive expansion plans. Selected NORR work in the Southeast includes the; Archer Landing Retail Centre in Gainesville, FL.; Oakleaf Retail Shopping Center, Jacksonville, FL.; and the Berry College Retail Complex, Rome, Georgia.

World wide, NORR is known for leadership in retail, commercial and hospitality projects. The firm's office in Dubai is the architect and engineer of record for The Avenues mall, which is set to be Kuwait's largest shopping, leisure and business destination when completed in 2010. For The Avenues, the first phase of which is now open, NORR's design was inspired by the topography and natural elements of the deserts of Kuwait. Similarly, in Detroit, the acclaimed MotorCity Casino complex reflects the rich history of that city's automotive industry.

NORR's ability to design and deliver projects unique to their community at any scale was explained by Coreen Paul, who oversees all NORR's commercial and retail work in the US. "Since 2001, for example, we've been part of the CVS/pharmacy National Architecture Program. We have been responsible for new construction, remodel and expansion projects for 275 stores in 21 states, so far. Individually, of course, these sites are at a completely different scale than The Avenues, but the same focus on designing for the local environment and superior project management apply. We are applying that same combination of design and management expertise for our Florida and South East region clients."
